DETAILED ACTION

Applicant's election without traverse of invention of Group I, corresponding to claims 1-12, drawn to a stacked semiconductor device, in the reply filed on July 14, 2004, is acknowledged.

However the Restriction Requirement of June 24, 2004 is withdrawn in favor of the new Election and Restriction Requirement that follows.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a stacked semiconductor device, classified in class 365, subclass 51.
- II. Claims 13-14, drawn to a semiconductor device, classified in class 257, subclass 692.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions claim distinct semiconductor devices where Group I invention recites a stacked semiconductor device with a memory chip and a semiconductor chip mounted one on another on top of a package substrate; while Group II invention recites a semiconductor device with notched bonding leads.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

This application further contains claims directed to the following patentably distinct species of the claimed invention:

- A/ Species of Figs. 1-3;
- B/ Species of Fig. 4;
- C/ Species of Figs. 5 and 6;
- D/ Species of Figs. 7 and 8;
- E/ Species of Figs. 9 and 10;
- F/ Species of Fig. 11;
- G/ Species of Fig. 12; and
- H/ Species of Fig. 13.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

It is further required that a single species be elected for examination on the merits and a listing of claims readable thereon, out of the claims from the elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
